Ajay.

Q2) Write a Java program to merge contents of two files into the third one.

```
import java.io.*;

class Merge
{
    public static void main (String[] args) throws
        IOException
    {
        PrintWriter pw = new PrintWriter ("three.txt");
        BufferedReader br = new BufferedReader (new
            FileReader ("one.txt"));

        String line = br.readLine();
        while (line != null)
        {
            pw.println (line);
            line = br.readLine();
        }

        br = new BufferedReader (new FileReader ("two.
            txt"));

        line = br.readLine();
        while (line != null)
        {
            pw.println (line);
            line = br.readLine();
        }
    }
}
```

```
mu.flush();  
br.close();  
mu.close();  
System.out.println ("Merged one.txt and two.txt  
into three.txt");  
}  
}
```

Aditya
