Qⁿ ②

```
import java.io.*;
```

```
public class Read file {
```

```
    public static void main (String [] args) throws  
        . Exception {
```

```
        FileWriter custom fwc = new FileWriter custom  
            ();
```

```
        fwc.write ();
```

```
        fwc.close ();
```

```
    }
```

```
}
```

```
class file writer custom {
```

```
    void file writer () throws Exception {
```

```
        int i;
```

```
        PrintWriter out = new PrintWriter (new FileWriter  
            ("new.txt"));
```

```
        for (i = 100; i < 150; i++) {
```

```
            out.println (i);
```

```
            out.flush ();
```

```
        }
```
