Q2 - Merge of files

```
Sol → import java.io.*;
        class Merge
        {
            public static void main (String[] args)
                throws IOException
            {
                Print Writer pw = new PrintWriter("File3.
                txt");

                BufferedReader br = new BufferedReader(
                    new FileReader("File1.txt"),

                    String line = br.readLine();
                    while (line != null)
                    {
                        pw.println(line);
                        line = br.readLine();
                    }

                br = new BufferedReader (new FileReader
                    ("File2.txt"));
                line = br.readLine();
                while (line != null)
                {
                    pw.println(line);
                    line = br.readLine();
                }
            }
        }
```

3

```
Pw.Flush();  
br.close();  
Pw.close();  
System.out.println("Merged file.txt and  
file 2.txt into file 3.txt");
```
