Q2

```java
import java.io.*;
class PGf
{
        public static void main (String[] args)
                        throws IO Exception
        {
        PrintWriter out = new PrintWriter ("two.txt
        PrintWriter pw = new PrintWriter (new FileWriter
                                    ("one.txt"));
for (int i=100; i< 150; i++)
{
            pw. println(i);
            pw. flush();
        }
System. out. println ("input done").
BufferedReader br = new BufferedReader
                            (new FileReader ("one.txt");
String line = br. readLine ();
out. println (" reverse");
while (line != null)
{
            String rev = new StringBuilder (line.
                                reverse(). toString ();
            out. println(rev);
            out. flush();
            line = br. readLine();
    }
```

```java
System.out.println("reverse done");
        pw.close();
        out.close();
    }
}
```
