Ans 2

```java
import java.io.*;

public class Readfile {
public static void main (String[] args) throws Exption {
fileWriter Custom fwc = new fileWriter custom ();
fwc. file writer ();
fwc palindrome ();
}
}

class fileWriterCustom {
void filewriter() throws Exception {
int i;
PrintWriter out = new PrintWriter (new file writer ("
One. txt"));
for (i= 100; i < 150; i++){
out. println (i);
out. flush () ;
}
}
```

Ritik

```java
void palindrome() throws IO Exception {
    ButteredReader reader = new ButterdReader (new fileReder
                            ("One
                             .txt"));

    PrintWriter outl = new PrintWriter (new fileWriter ("
                       two
                       output.txt"));

    String line = reader.readLine();
    outl.println("Printing Reverse");
    while ( line != null) {
        String reversed = new StringBuilder (line).reverse()
                          .toString();

        outl.println (reversed);
        outl.flush();

        line = reader.readLine();
    }

    reader.close();

}

}
```
